

*EDENSET SCHOOL CAMPUS FILLED WITH STUDENTS, AGAIN, AFTER GOVERNMENT 7 MONTH SCHOOL COVID-CLOSURES*

## **ELECTRICITY ARRIVES AT EDENSET PRIMARY AND NURSERY SCHOOL, Luwero district, Uganda.**

The SEA (School Electric Access) project succeeded because of RABS and Pastor Cyndi Higgins, the Founder and International Director of Run Away Brides International Ministries USA with evangelical and humanitarian programs in East Africa. Through RABS, she supported the school to access electricity.

Edenset Primary and Nursery school, a remote school providing education to a community which according to 2002 Kamira sub county baseline survey had 0.4% of the population with ordinary level of education certificate. No wonder, the area is deeply-rooted in backwardness in social, economic and spiritual conditions. Located in the heart of Luwero district in Uganda, the area could never access electricity as now seen fully connected to the service through the support of RABS. This is a great ray of hope for the school to solve the frail sections of its efforts to reach out and sustain academic excellence.

This divinely designed opportunity comes following Pastor Cyndi Higgins compassionate heart to serve Christ in the heartland of Africa and in a holy discontent of passionately desiring to see children in Africa receive quality education as well as a Christ transformed community. She was at the school located in a 'small' remote village called Nabinaka, in Mazzi parish, Kamira sub county in Luwero district, Uganda in 2018. She ecstatically preached in a RABS Conference organized by Good Samaritan Outreach International Church with, a 'big God,' on the homeland of the school where she left the community set free from bondage. No sooner had she left, the government then planned to extend an electricity grid to the village which is over 30 kms away from the nearest electricity grid. Praise the Lord that now the light of Christ does not only get seen in the spiritual but is also manifested in the physical illuminating the dark parts of life.

**HIGHLIGHTS OF IMPLEMENTATION ACTIVITIES FOR THE SEA PROJECT** The project implementation activities circled around the 5-classroom block, staffroom, administrative block, dormitory, and the chapel/church and included acquisition of electricity license, purchase of materials, wiring, installation, and labor. Materials were purchased according to the budget and delivered on site and work begun on 21st of December, 2021 despite the interruption that came about due to the demise of Eve Clive's father the late Serko

Edward on the 22nd /12/2021. The contractors engaged in the activities were from a company known as Billy electricals LTD from Kampala.

### **IMPACT / OUTCOMES OF THE ELECTRICITY INSTALLATION**

What an amazing impact that has quickly come with the electricity installation program as implemented at the school! So far: 1. There has arisen general parent and community excitement and great hope in achieving their educational objectives for their children. This has led to a start of the biggest number of the previous students approaching 400 despite Covid 19 effects yet other schools within the area are struggling with very few students' enrolment. 2. More new students have been enrolled with increased appreciation from parents, local leaders among others. 3. There has been growth in church/chapel attendance, membership as well as Sunday school that is building a generation which will have more people appreciating Christ's work in their lives as well as upholding moral uprightness. 4. Three new qualified teachers from distant districts have been recruited and they have accepted to live and work with the school that needs them most which was not so before electrical installation, as they see a promising future and opportunities to further their career through research.

*STUDENTS THRILLED TO BE BACK IN SCHOOL*

### **THERE'S STILL WORK TO BE DONE:**

Because the five semi-finished permanent classrooms that the school has are unable to provide learning facility enough for children from Nursery to grade

*NEW 4 CLASSROOM COMPLEX*

7, the school with the little savings from school fees paid, raised a 4-classroom block to foundation level in August 2021. From here well-wishers, Mrs. Harriet & Joseph Sserwadda came in and supported with the building to wall plate level. However, with electrical installation there has been increased enrolment that created a need that now urgently requires completion of the building otherwise learning of the children is at stake. Therefore, we long for your prayers and still believing God for phased completion starting with roofing that has been estimated at a budget of 18,305,000 UGX (\$5,720.00 USD) and soon thereafter do electrical installation estimated at 2,107,000 UGX (\$658.00 USD). ### **YOUR TAX-DEDUCTIBLE DONATIONS IMPACTS YOUNG LIVES—THANK YOU FOR YOUR GENEROSITY THAT WILL CHANGE FUTURE GENERATIONS—**

*We here at RABS hope and pray you will continue supporting these educational programs in East Africa. Next issue will share the tremendous young lives your donations saved from starvation, forced child-bride sale, thievery, and death in Karamoja District, Northern Uganda.*

Love and Blessings,  
Pastor Cyndi Higgins
